

ACCESSIBLE CUSTOMER SERVICE POLICY

Family Service Toronto (FST) is committed to achieving a fully accessible organization. To achieve this commitment, all FST personnel share in the responsibility for advancing accessibility by playing unique and important roles in removing and preventing barriers to participation.

FST strives at all times to provide its programs and services in a way that respects the dignity and independence of people with disabilities. In planning the location and use of offices, the organization considers the accessibility, availability and affordability of public transportation; the location of other relevant community resources; and the special needs of service recipients. FST is committed to providing people with disabilities the same opportunity to access and benefit from the same programs and services, in the same place and in a similar way as other service users. FST will ensure as many service facilities as possible are free of architectural barriers and design and adapt its programs and services, as appropriate, to accommodate the visual, auditory, linguistic and motor abilities of the people it serves.

This policy outlines FST responsibilities in providing programs and services to people with disabilities in compliance with the *Accessibility for Ontarians with Disabilities Act, (2005), Accessible Customer Service Standard.*

Scope

This policy applies to all FST personnel (employees, students, volunteers).

Definitions

A disability, as defined by the *Accessibility for Ontarians with Disabilities Act*, includes physical, mental health, developmental and learning disabilities. Disabilities come in many different forms, sometimes obvious and sometimes not. Disabilities may be visible or invisible, they may differ in severity, and the effects of a disability may be continuous or intermittent.

For example:

- A person with a brain injury has a disability that is invisible.
- A person with arthritis has a disability that over time may become more severe.
- A person with multiple sclerosis has a disability that may sometimes affect daily routine and other times not.

The impact of a disability depends on the person's ability to access services, assistive devices, transportation, education and employment.
